Cards Against Agrarianship

This game may look like Cards Against Humanity to the casual observer. And they would be right. The rules are the same, the goals are the same. The cards are even the same dimensions as the official (free) PDF version of it, so you can integrate it into your existing deck.

Because why wouldn't this win?

How to play in exactly 50 words:

Each player draws ten white cards.

One person is the judge. They read a black card. Everyone else puts a white card facedown. The judge reads all answers out loud and decides which they like best.

The person with the most black cards at the end of the game wins.
